## PROFESSIONAL EXPERIENCE

**Junior Web Developer**                                                                                     Nov '20 - Dec '22

**Full Creative**                                                                                                    Tamil Nadu, India

- **Revamped** 30+ web pages for Setmore's branding website, optimizing for performance, mobile-friendliness, and fast loading
- **Collaborated** with design, content, and marketing departments to deliver web pages **meeting their requirements** and **deadline**
- **Developed** and **maintained** the front-end code for 5 micro front-ends(Booking Page, EasyShare, Services, Reviews, Activities) that the product encompasses, ensuring the UI components developed are mobile friendly
- **Inspected** the web app for UI issues along with the testing team and resolved issues identified quickly
- **Automated** recurring tasks and **expedited** website migration to Next.js by developing internal tools.
- **Mentored** 4 web development interns and conducted reviews and mock reviews for several interns
- **Assisted customers** with their queries on the product as a support staff on a weekly basis
- **Coordinated** with product owner/manager, designers, software developers, and testers to expedite sprint deliverables within the designated timeframe
- **Deployed** and stored assets on Google Cloud Platform (GCP), utilizing service such as Google Cloud Storage.
- **Troubleshot** and **resolved** errors on Google Cloud Platform (GCP) using Google Cloud Console

## INTERNSHIPS

**Web Development Intern**                                                                                   Jul '20 - Oct '20

**Full Creative**                                                                                                    Tamil Nadu, India

*Took 1 month break from September 1,2020 - September 30,2020 to Prepare for College Examination*

- **Learned** about web development technologies such as HTML, CSS, SCSS, JavaScript and build tools such as gulp, webpack and developed 5 email templates, 4 web pages and 3 web apps.
- **Boosted site performance** by implementing techniques such as file minification and compression, image optimization, layout shift reduction, and priority-based asset loading, including lazy loading and preloading.Reference: https://github.com/haneefmhmmd/Full-Creative
